**Maxi Beam Tailored Shapes**  
*~As adaptable as your imagination~*

**Maxi Beam To Light It Up**  
*~Integrated lighting to point the way~*

# MAXI BEAM IDEAS

## Adaptable Architectural Tools

As the inventors and manufacturers of *Supaslat* **MAXI BEAM**, Australia's leading MAXI BEAM brand, it is SUPAWOOD's pleasure to sponsor this document which provides examples of just some of the applications possible with the light weight, large scale and rigidity of the lightweight beams.

All the images shown in this booklet show Supaslat MAXI BEAMS which SUPAWOOD have proudly supplied. Since 2009 we have supplied over 300,000 LM of beams and no two projects have been the same.

We'd like to thank our design and construction partners for providing us with a never-ending source of inspiration and interesting applications.

If you would like more product information or discuss how to use MAXI BEAMS in your next project, please contact our team on...
