ARCHITECTURAL LINING SYSTEMS

# Workspace Interiors

When creating aesthetically pleasing activity-based workspaces, the design consideration is to prioritise acoustics and ergonomics to ensure peoples' health, wellbeing and comfort.

SUPAWOOD products have been used in hundreds of office fitout projects to achieve inspiring environments where people love to work. Our lining products are fully customisable and available in acoustic, fire rated and Green Star options.

We look forward to partnering with you to deliver your next dynamic and agile workspace fitout.

SUPATILE SLAT ceiling using the corporate colours of white and yellow in a staff breakout

SUPACOUSTIC slotted walls in SUPACOLLOUR white and curved SUPALINE in SUPACOLLOUR high gloss red denote the corporate colours in the reception area

# Sustainable Design

SUPAWOOD can meet your project's sustainability requirements including Green Star rating. We are a certified FSC and PEFC Chain-of-Custody supplier. Our lining solutions can also be specified in materials with low VOC and Formaldehyde emissions.

We will work closely with your design team to ensure a high level of environmental efficiency throughout your project.

Cyberspace pattern ceiling tiles  
in SUPAFINISH Tasmanian Oak

## Acoustics

SUPAWOOD have high end architectural linings for reverberation control and optimal acoustics. This is crucial in any busy environment where noise needs to be controlled.

We can supply full NATA certified test results, scattering coefficients and other technical documentation, all designed to help you make the right choice for your next project.

combined with SUPASLAT loose slats finished  
in SUPAFINISH Tasmanian Oak laminate

# Product Range

## Panels

**SUPATILE** – Drop-in ceiling tiles that address noise reverberation in open workspaces with style.

**SUPACOUSTIC** – High-performing decorative acoustic panels to address noise reverberation. Perfect for meeting rooms and quiet zones. Panels are suitable for both ceilings and walls, and patterns can be customised to suit the client's brand.

**SUPALINE** – Durable decorative panel system for feature walls and ceilings. Ideal for high traffic areas such as lobbies, receptions, atriums and corridors. Panels are generally solid, but grooved or routed effects are possible.

## Slats

**SUPATILE SLAT** – Fully accessible slatted ceiling tiles make designing distinctive breakout and collaboration spaces easy.

**SUPASLAT** – Versatile linear slatted wall and ceiling panels. Great to transform any reception, collaborative or corridor space.

## Beams

**ALUCLICK** – Aluminium decorative beam system. Beams 'click lock' into a standard suspension system. Applications include exterior façade upgrades and entry areas.

**MAXI BEAM** – Lightweight beam system for feature beam ceilings, walls or screens. Use semi-visual screens as dividers between receptions, breakout areas and the main office space.

**WAVE BLADES** – Sculptured timber blade features for ceilings and walls. Create eye-catching contoured effects in reception and open workspaces.

**WAFFLE BLADES** – Striking geometric ceiling effects made easy. Blades can be criss-crossed and angled in a myriad of ways. Ideal for reception and collaborative spaces.

Supawood can adapt an innovative solution for your unique design requirements.

### Lighting

This can be incorporated between slats, beams and panels or set into slatted and flat panels in a regular pattern. Other lighting such as pendent lighting can be hung from or between panels.

### Airconditioning Diffusers

Linear diffusers can be placed between beams and slats, concealed in services zones, or square diffusers can be used to fill a half panel space.

### Other Services

Fire sprinklers, smoke detectors and other services can be set out neatly between panel components or centred in panels wherever possible.

### Access Panels

Hidden access to services in the wall or ceiling cavity is an option available across our range. Our SUPATILE ceiling tile products will provide full accessibility across the entire ceiling.
